PROFILE

Technology and delivery leader with 12 years in information technology, delivering enterprise platforms for global clients in oil and gas (energy), healthcare, life insurance and aviation at Accenture, NTT DATA, HCL Technologies and Sopra Steria. Works end to end, from understanding the business need and shaping requirements, through Agile and Scrum delivery, to UAT and go-live. Progressed from analyst to Associate Manager and Software Test Architect at Accenture, leading a team of 15 across India, the US and Australia and earning an ACE Award in 2024. Led a Generative AI initiative that automated more than 14,000 test cases and raised productivity by 70%, later adopted across Accenture projects. Now a Durham MBA candidate, learning how senior leaders weigh strategy, economics and finance when making decisions.

AREAS OF EXPERTISE

Digital Transformation • Generative AI, LLMs & Digital Twin • Test Architecture • Test Automation & CI/CD • Strategy & Finance (MBA) • Agile & Scrum Delivery • Stakeholder Management • Global Team Leadership • End-to-End Delivery • Oil & Gas (Energy) • Healthcare & Life Insurance • Airline

EXPERIENCE

Accenture | **Associate Manager** Noida, India | Jan 2022 – Oct 2026

Led quality engineering and test architecture for enterprise energy platforms at a global professional services company, working in Scrum teams.

- Led a GPT-based Generative AI proof of concept that automated more than 14,000 test cases, increasing productivity by 70% and reducing resourcing from 10 manual testers to 3 automation testers; the solution was adopted across multiple Accenture projects.
- Led quality engineering for digital twin delivery across more than 12 facilities, aligning product, engineering and business stakeholders on quality, user impact and business priorities.
- As Software Test Architect, designed automation frameworks and reviewed Git-based CI/CD pipelines, using Selenium, Playwright, Jenkins, Azure DevOps and Git.
- Managed and developed a distributed team of 15 across India, the US and Australia, and designed training on automation frameworks for functional and QA teams.
- Increased test coverage from 65% to 82% by strengthening automation, quality monitoring and risk-based testing, translating technical risks into clear recommendations for decision-makers.
- Partnered with business analysts through UAT and took part in go-live, making sure releases met the business requirements they were built for.
- Recognised with an Accenture ACE Award (2024).

HCL Technologies | **Senior Test Lead** Noida, India | Oct 2021 – Jan 2022

Global technology services company delivering digital transformation and engineering solutions.

- Directed quality assurance for enterprise applications, balancing product requirements, operational needs and business priorities.
- Aligned quality outcomes with the product vision, communicating risks to stakeholders and supporting delivery decisions.

NTT DATA | **Senior Test Analyst** Noida, India | Sep 2019 – Oct 2021

Global IT services and consulting company.

- Worked on healthcare applications for employers, employees and providers, and on Jackson National Life's application modernisation.
- Built a Selenium and Java automation framework from scratch, cutting manual regression effort by over 50% within two quarters.

Sopra Steria | **Senior Software Engineer** Noida, India | May 2018 – Sep 2019

European technology and digital services company.

- Handled and managed the easyJet web application end to end, covering the booking and payment journeys and GDPR compliance, across web, mobile and API testing.
- Worked closely with development teams to analyse defects, identify root causes and support reliable resolution.

NTT DATA (formerly Dell Services) | **Testing Engineer Analyst** Noida, India | Dec 2014 – May 2018

- Tested healthcare applications in high-compliance environments and supported the modernisation of legacy systems into web applications, safeguarding data integrity throughout.

Swatantra Shakti Foundation | **Ambassador (Voluntary)** Remote | Feb 2026 – Present

Community organisation supporting women's health and challenging stigma around menstrual health.

- Helped coordinate a myth-busting session with doctors, connecting community members with accurate, trusted health information and creating open, supportive spaces for discussion.

EDUCATION

Durham University Business School | **Master of Business Administration** Durham, UK | 2026 – 2027

- Skills learned: strategy, economics, accounting and finance, leadership, management consulting and technology forecasting, applied through the Boardroom Exercise and the Strategic Consulting Project.
- Member, Consulting Club.

Amity University | **B.Tech, Information Technology** Gurgaon, India | 2010 – 2014

- Result: Distinction (CGPA 7.13/10).
